

The Product Realization Company

BEST IN THE WORLD AT PRODUCT REALIZATION

Plexus delivers optimized Product Realization solutions through a unique Product Realization Value Stream service model. This customer-focused services model seamlessly integrates innovative product conceptualization, design, commercialization, manufacturing, fulfillment and sustaining services to deliver comprehensive end-to-end solutions for customers in the Americas, European and Asia-Pacific regions.

Plexus is the industry leader in servicing mid-to-low volume, higher complexity customer programs characterized by unique flexibility, technology, quality and regulatory requirements. Award-winning customer service is provided to over 140 branded product companies in the Networking/Communications, Healthcare/Life Sciences, Industrial/Commercial and Defense/Security/Aerospace market sectors.

WE PRIDE OURSELVES ON HIRING THE BEST

Now we are looking for a **NPI Planning Associate** to join our team:

Purpose: Responsible for supporting the NPI planning processes, progressing the NPI builds to meet the customers requirements in line with the NPI schedule and providing the reports necessary to effect appropriate escalation in cases of delay. To identify the location of every individual NPI build in real time and inform the NPI and manufacturing teams of any blockages in progress.

Your Key Job Responsibilities:

- Support the NPI Planner in scheduling all NPI activities across all processes
- Report the NPI progress to the NPI and Manufacturing teams for all active NPI builds
- Track the NPI Microplans and identify issues affecting execution
- Develop and maintain a reporting process to quickly identify the overall NPI status
- With the NPI Planner, work with CFT's and Process Engineering to facilitate execution to meet schedule
- Monitor the Workzone project status for the NPI department and highlight any potential delays
- Prepare adhoc reports and updates for the NPI function to summarize performance to the site leadership

Your Skills and Qualifications:

- A minimum of a Bachelor's degree in Technical/Engineering
- Experience of 2 years is required for this position/Minimum 3 years working in a manufacturing operations environment.
- Understanding of Manufacturing process flow and general Manufacturing processes is highly desirable
- A general knowledge of manufacturing and planning processes is preferred
- Good Excel skills.
- Very good English
